UncommonX

Advanced MDR+ Security You Can't Get Anywhere Else

Safeguard yourself with the most advanced security solution on the market that goes way beyond managed detection and response (MDR).

Using the power of our patented BOSS (Business Operations Security Suite) platform, the latest AI and forensic tools, and the world's best proprietary threat intelligence database, we give you insights –and personalized protection – no one else can offer.

No UncommonX-protected system has ever suffered from a reportable breach. Talk to us about how we can protect you.

We Show You Risks Others Can't and Protect in Ways Others Don't

Our innovative BOSS platform maps every device on your network and identifies vulnerabilities 24/7. This unmatched network visibility and context-based intelligence lets us provide MDR+ level protection to meet your specific needs.

- Provides more in-depth insight about your risks as they arise to help you stay safer
- Uncovers and patches vulnerabilities and defective devices in less time
- Delivers faster, more effective responses to stop threats and incidents
- Reduces overhead with an agentless approach to discovery and data collection
- Allows better risk decisions with context-based data most meaningful to you

BOSS can be combined with our 24/7 Security Operations Center (SOC) services.
