

# Protect Your Business. Assess Your Security Maturity Now.

Just one small gap in your system can expose you to a possible cyberattack. Identify issues now that can lead to major security problems later. Leveraging our patented BOSS (Business Operations Security Suite) XDR, our next generation SaaS threat management and intelligence platform, our security team will run a security maturity assessment to assess your infrastructure.

Then you'll receive a comprehensive report with a clear plan-of-action on how you can strengthen your protection, improve related efficiency, and lower costs.

## How a Security Maturity Assessment Helps Protect You

Our expert risk specialists and technicians will work with you closely to provide the following benefits:

- Get a clear view of your company's security posture
- Reduce security threats by uncovering vulnerabilities
- Inventory all your assets and identify any unknowns
- Align your security with your business objectives
- Verify you meet regulatory compliance requirements

## Find Out How Safe You Really Are. Call Us.

Schedule an assessment today. Find out how safe you really are and how much safer you can be. Call **866-405-9156**, email [sales@uncommonx.com](mailto:sales@uncommonx.com), or scan the QR code to go to [UncommonX.com](https://uncommonx.com).
