

# Get Advanced MDR+ Security Solutions No One Else Offers

Safeguard your organization with the most advanced security solution on the market that goes way beyond managed detection and response (MDR). No UncommonX-protected system has ever suffered from a reportable breach.

With the power of our patented BOSS (Business Operations Security Suite) platform, the latest AI and forensic tools, agentless deployment, and the world's best proprietary threat intelligence database, we deliver personalized protection no one else can.

## We Show You Risks Others Can't and Protect in Ways Others Don't

Our innovative BOSS platform deploys quickly, maps every device on your network, and identifies vulnerabilities 24/7. This unmatched network visibility and context-based intelligence lets us provide MDR+ level protection to meet your specific needs.

- Provides more in-depth insight about risks as they arise to help you stay safer
- Uncovers vulnerabilities in real-time
- Delivers faster, more effective responses to stop threats and incidents
- Reduces overhead with an agentless approach to discovery and data collection
- Allows better risk decisions with context-based data most meaningful to you
- Financial organizations often have outdated cybersecurity systems

BOSS can be combined with our 24/7 Security Operations Center (SOC) services.

## Compare Our MDR+ Services to Other Providers

Combining our BOSS threat intelligence with the industry expertise of our SOC team, our 24/7 services expand beyond what most provide by offering unmatched cybersecurity protection.
